2026 Guide

EV Charging Solutions
for Commercial Sites

Free Download

Why EV Charging Matters for UK Businesses in 2026

- The UK's EV transition is accelerating—regulations, customer demand, and sustainability goals make charging infrastructure essential.
- Offering EV charging increases your site's appeal to customers, tenants, and employees.

ENVIRO EV

Key Considerations for Site Owners

- Power Capacity: Can your site's electrical system handle chargers?
- Dwell Time: Match charger type (AC for longer stays, DC for quick turns).
- User Experience: Prioritise ease of use, simple payments, and accessibility.
- Compliance: Ensure installations meet UK safety and technical standards.
- Cost: Consider upfront costs, maintenance, and available grants.

Choosing the Right Charger

Feature	AC Charger	DC Charger
Best For	Workplaces, hospitality	Forecourts, logistics
Speed	3–7 hours (typical)	20–60 mins (typical)
Investment	Lower	Higher
Scalability	Easy to add more units	Suited for high-traffic
Smart Features	Solar integration, remote monitoring, dynamic load management	

Installation Process: Step-by-Step

1. Site Survey & Feasibility Assessment
2. DNO Application & Grid Connection
3. Charger Selection & Procurement
4. Installation by Accredited Engineers
5. Testing, Certification & Commissioning
6. Onboarding & Training for Staff
7. Ongoing Support & Maintenance

Maximising ROI

- Apply for government grants (e.g., Workplace Charging Scheme).
- Offer charging as an employee perk or revenue stream.
- Choose hardware with low running costs and high reliability.
- Monitor usage and maintain equipment to reduce downtime.

About Enviro EV

Enviro EV Ltd delivers turnkey EV charging solutions across the UK, with exclusive rights to advanced AC/DC hardware. Over 200,000 chargers deployed globally. Full support, compliance, and future-proof technology.

Case Study Spotlight

A leading UK hospitality group installed Enviro EV's AC chargers across 12 sites, increasing customer dwell time and generating new revenue. The project was delivered in 14 weeks with zero unplanned downtime.
